

SEMANTIC INTEROPERABILITY FOR RESILIENT, SCALABLE AND RESILIENT DATA EXCHANGE

Maximilian Stäbler, 22.11.2023

DLR-Institute for AI Safety & Security – Sankt Augustin and Ulm

GOAL DEFINITION

Telephone Switchboards:

The first
Interoperability
Service
(1915)

Automated, scalable and resilient Semantic Interoperability

Status Quo

“hallo”

{language : german}

“hallo”

Automated, scalable and resilient Semantic Interoperability

Goal – a Semantic Interoperability Service (SIS)

“hallo”

{language : german, korean}

“안녕하세요”

PROBLEM DEFINITION

(Meta) Data is heterogeneous – Problem solved?

HOW STANDARDS PROLIFERATE:
(SEE: A/C CHARGERS, CHARACTER ENCODINGS, INSTANT MESSAGING, ETC)

<https://xkcd.com/927/>

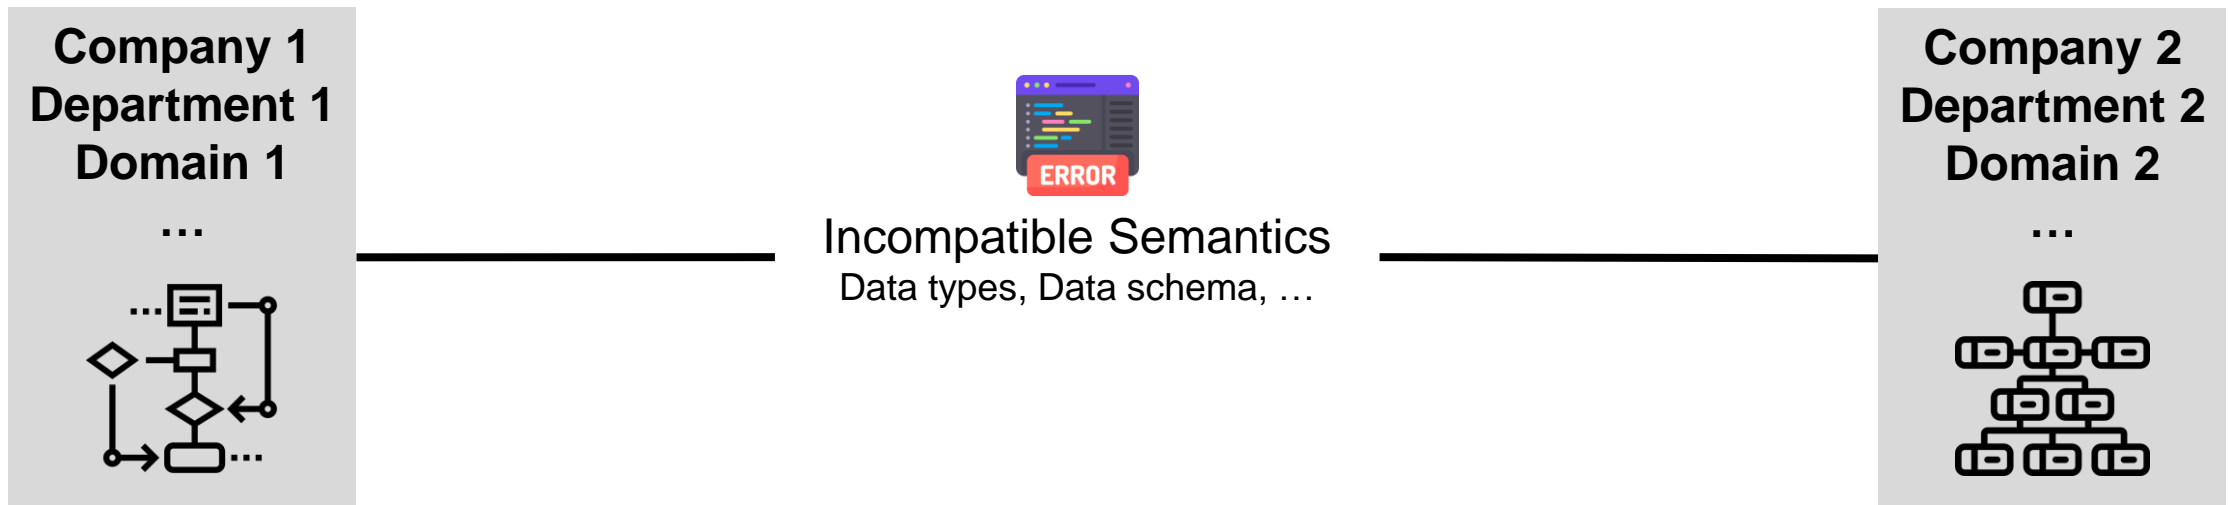

Interoperable Solutions / Applications

Currently: Incompatible Semantics

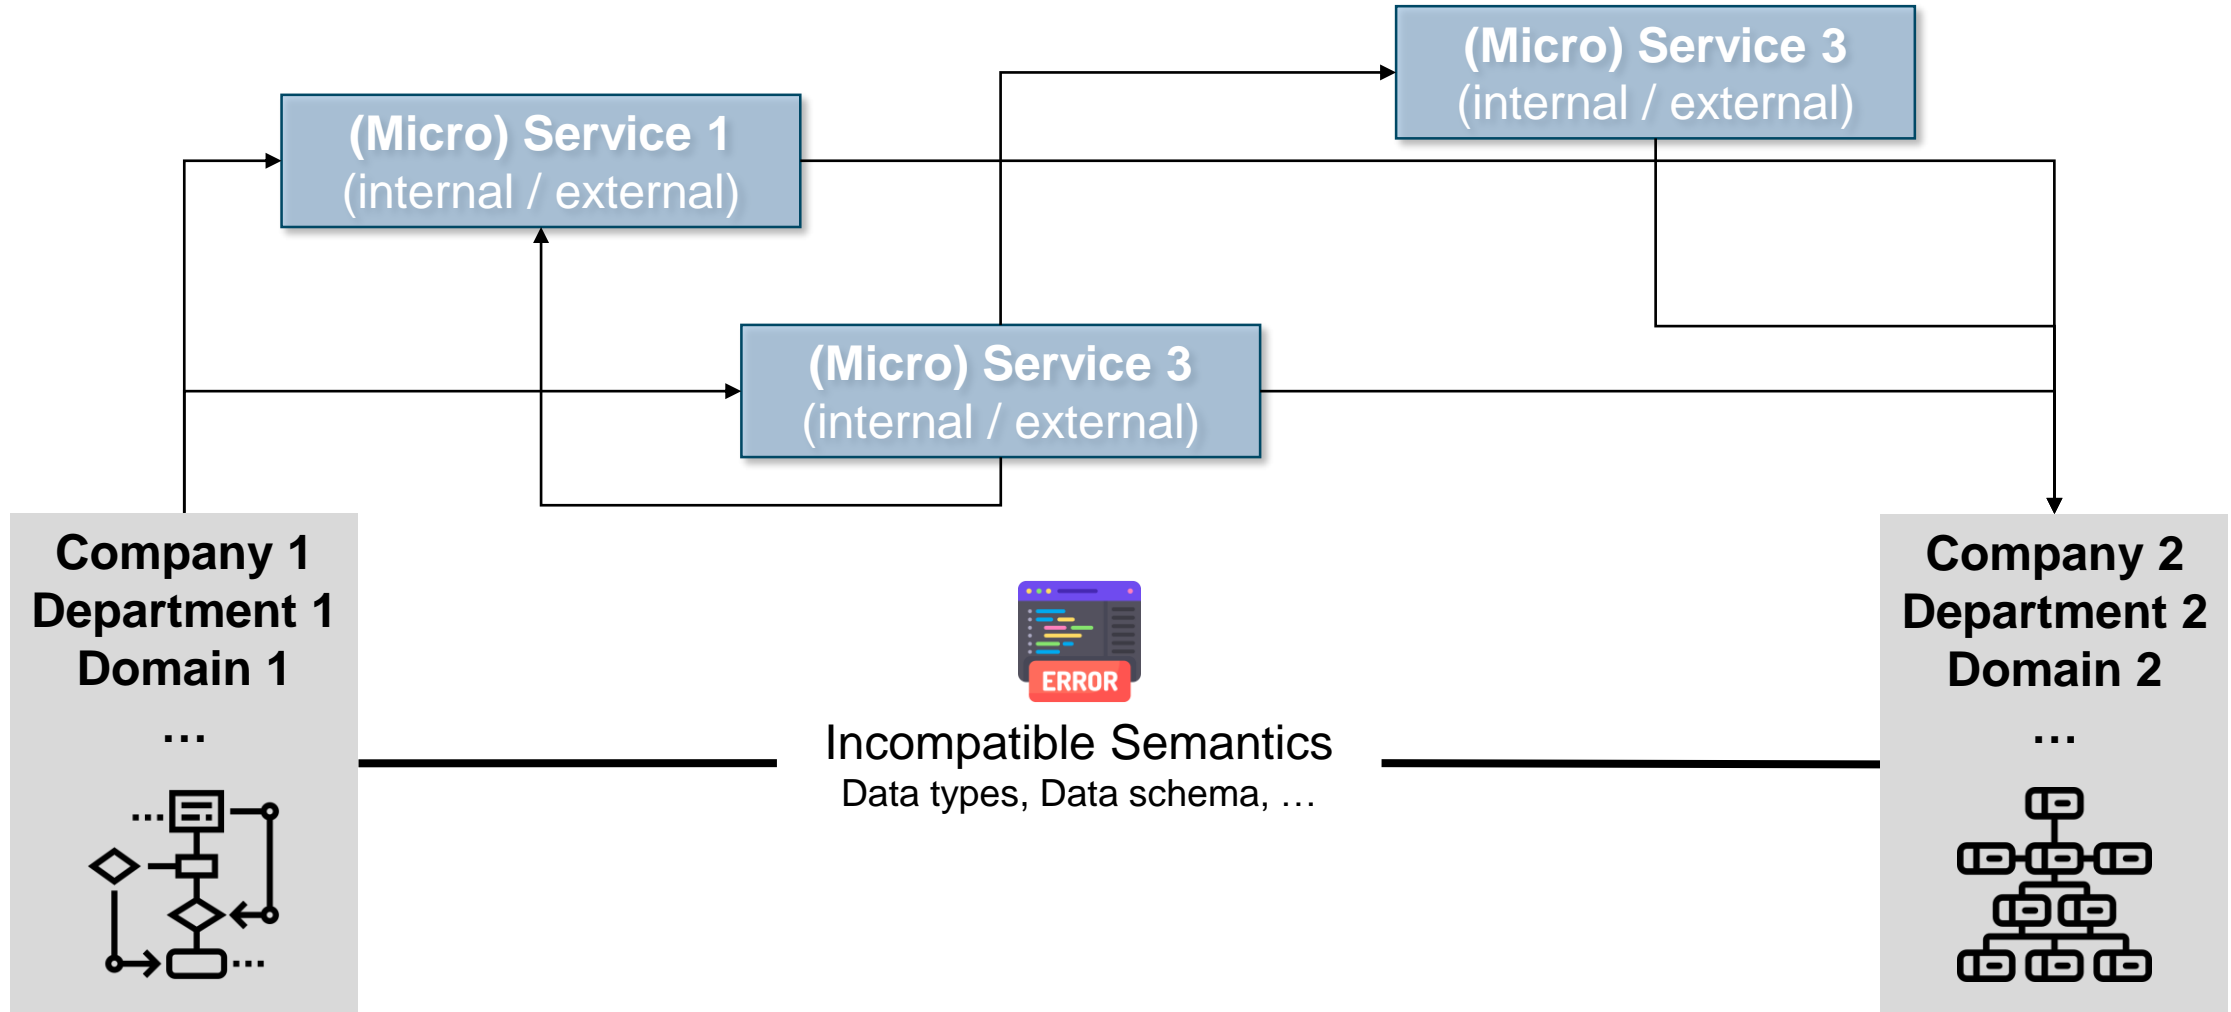

Data Models of the supply side
are misunderstood and misused
by the **exploitation side**

Data Requirements of the
exploitation side are misunderstood
by the **supply side**

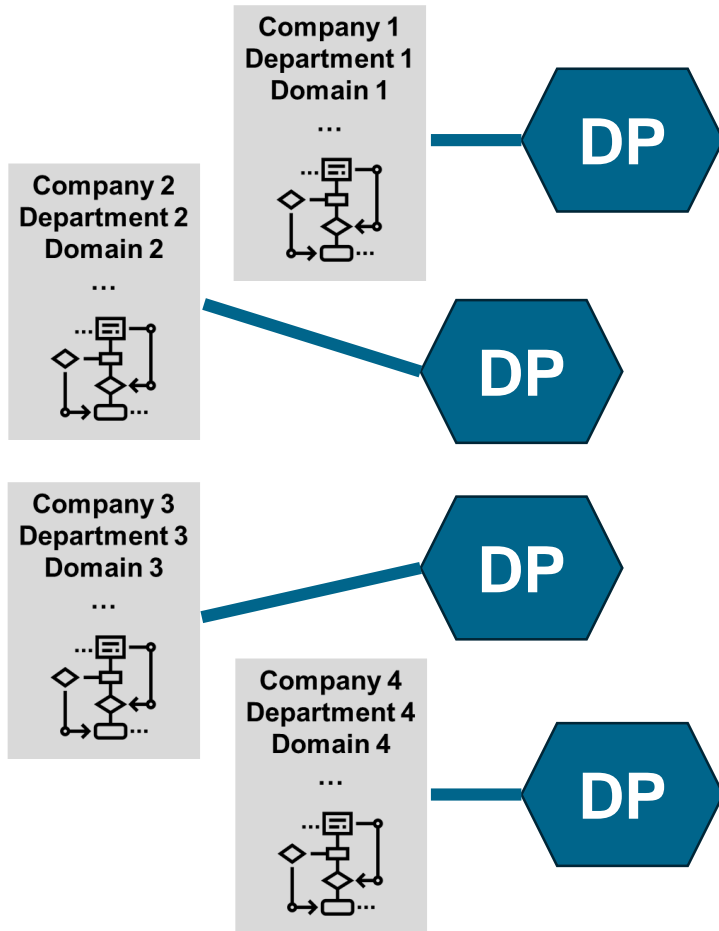

Interoperable Solutions / Applications

Current Solution: Complex and highly manual service landscape

Semantic Interoperability

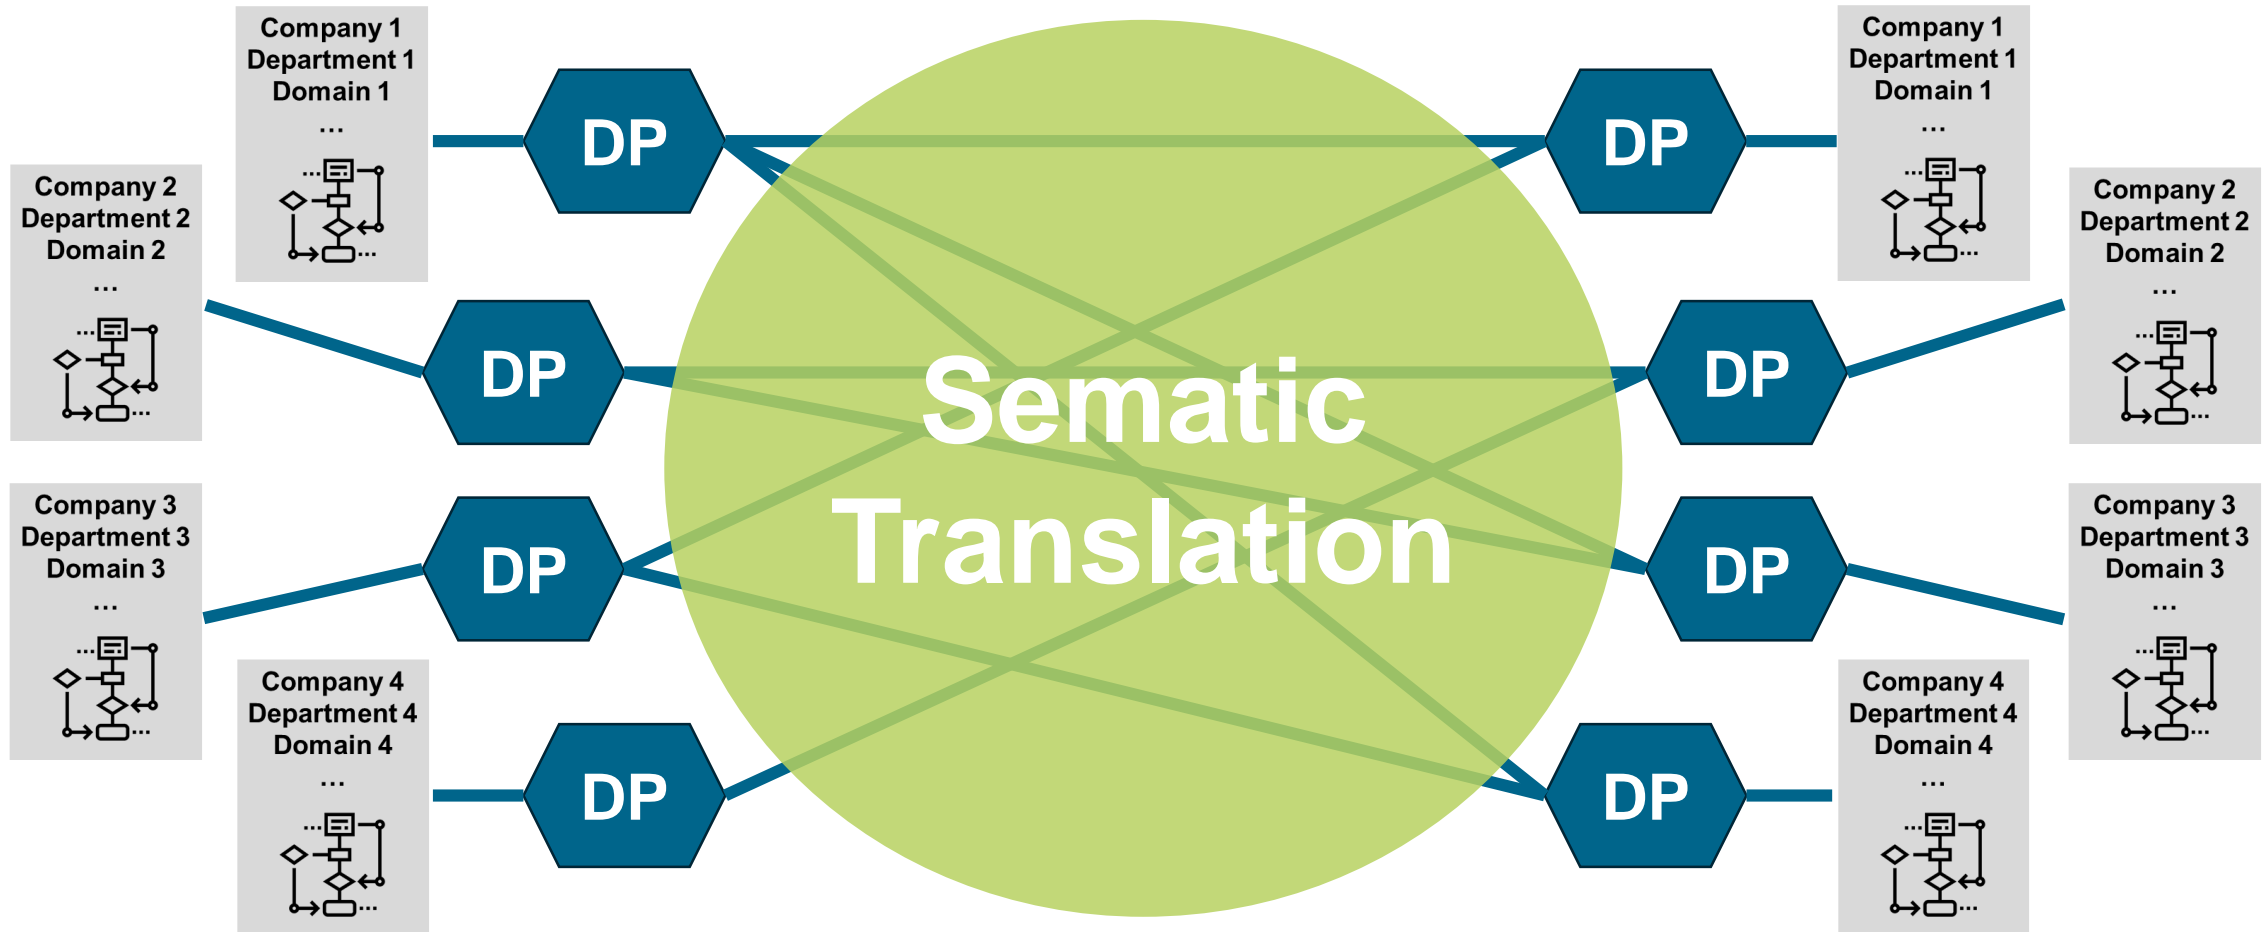

Goal: Overcome Semantic Chasm // Data Mesh Principles

DP = Data Product

Semantic Interoperability

Goal: Overcome Semantic Chasm // Data Mesh Principles

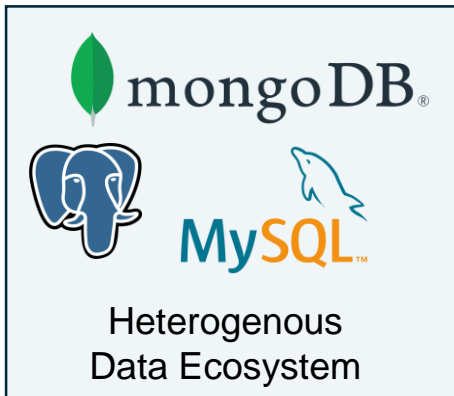

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

“Yes we have data”

id	...	<feature 3>
int	...	string

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

Tomorrow

“Yes we have data”

“Yes we have data and it is well described”

Heterogenous Data Ecosystem

id	...	<feature 3>
int	...	string

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

“Yes we have data”

Tomorrow

“Yes we have data and it is well described”

The day after tomorrow

“Yes we have data and it is described so others can understand”

Heterogenous Data Ecosystem

id	...	<feature 3>
int	...	string

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string
<i>Meta-Data</i>		<i>Meta-Data</i>

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

id	...	<feature 3>
int	...	string

Tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string

The day after tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string
<i>Meta-Data</i>		<i>Meta-Data</i>

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

id	...	<feature 3>
int	...	string

Tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string

The day after tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string
<i>Meta-Data</i>		<i>Meta-Data</i>

Semantic Interoperability for resilient, scalable and resilient data exchange

Today

id	...	<feature 3>
int	...	string

Tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string

The day after tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string
<i>Meta-Data</i>		<i>Meta-Data</i>

Semantic Interoperability for resilient, scalable and resilient data exchange

The day after tomorrow

id	...	<feature 3>
int	...	string
xsd:int		Xsd:string
<i>Meta-Data</i>		<i>Meta-Data</i>

Possibility to automate processes

Benefits:

- Scalability
- Robustness by automated re-orchestration
→ **Resilience**
