# Shaping Europe's Digital Future – European Strategy for Data

---

The strategy for data focuses on **putting people first in developing technology**, and **defending and promoting European values and rights** in the digital world.

Data is an essential resource for

- economic growth
- Competitiveness
- Innovation
- job creation
- societal progress in general

# Shaping Europe's Digital Future – European Strategy for Data

---

The European strategy for data aims at **creating a single market for data that will ensure Europe's global competitiveness and data sovereignty.**

Common European **data spaces will ensure that more data becomes available** for use in the economy and society, while keeping the companies and individuals who generate the data in control.

Data driven applications will benefit citizens and businesses in many ways. They can e.g.:

- improve health care
- create safer and cleaner transport systems
- generate new products and services
- reduce the costs of public services
- improve sustainability and energy efficiency

The Commission has proposed a **Regulation on European data governance** as part of its data strategy.

# Gaia-X – Guiding Principles

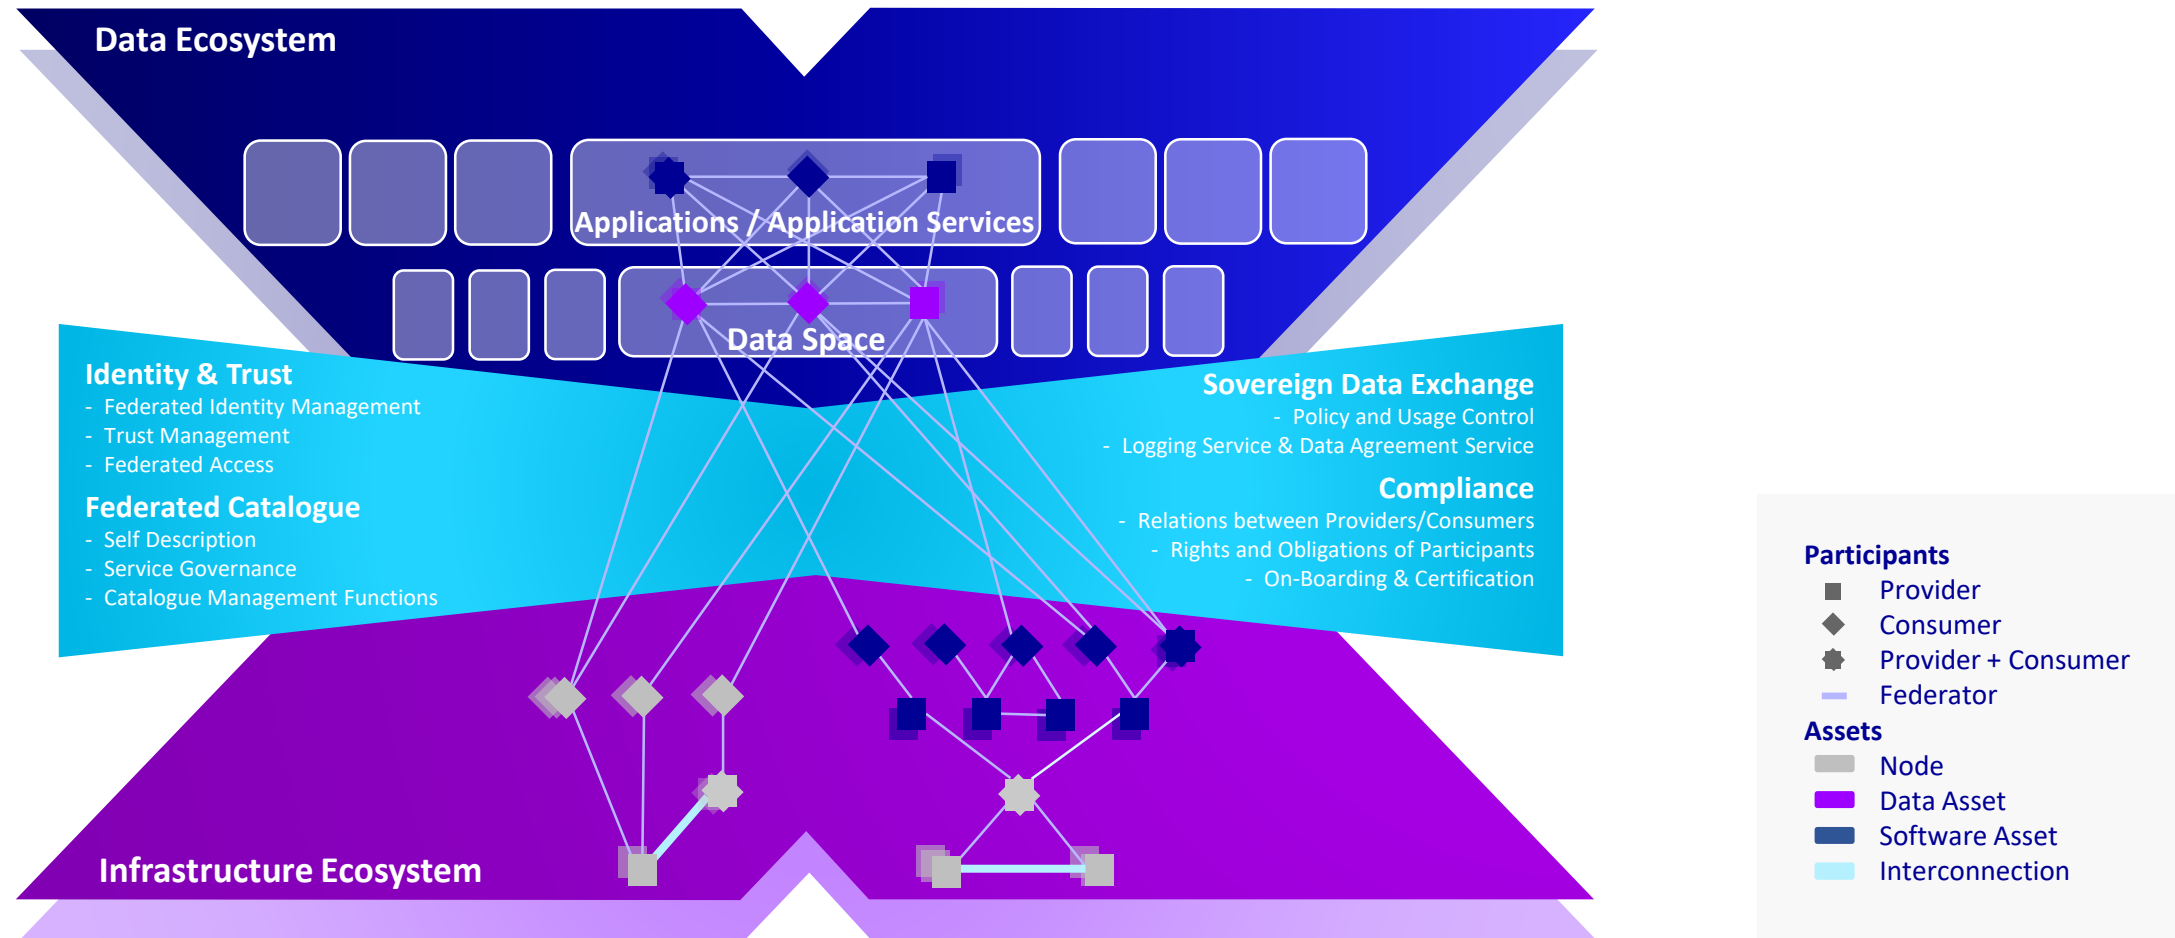

Gaia-X will be the basis for a **digital ecosystem** in which data and services can be made available, integrated/merged, shared and used securely and with an ultimate level of trust.

Based on **European values**, Gaia-X implements the following guiding principles:

- European data protection principles
- Authenticity and trust
- Openness and transparency
- Sovereignty and self-determination
- Free market access as well as European stability and growth
- Modularity and interoperability
- Usability

# Gaia-X – Guiding Principles

Governance Framework: Gaia-X Policy Rules and Gaia-X Architecture of Standards

# Gaia-X Introduction: The offered Solution

---

## The Idea

Access and share data through a federated data infrastructure to ensure innovation for our future thanks to the next generation of information technology..

## The goal

Promote the creation, expansion, adoption and growth of digital ecosystems that can be commercialised in and across Data Spaces.

## European cooperation

Ensuring the efficiency of the European data infrastructure, based on European values and supported by the European Commission.

## Highest possible safety

Maximum data sovereignty for businesses, customers, and governments through services that ensure interoperability and privacy by design

## Transparency

Ensuring open interfaces and standards to enable the aggregation of data while fostering innovation and efficiency in a transparent environment.

## Protection of rights

Ensuring the privacy of citizens as a human right and respecting the sovereignty of other nations.

# Several mobility-related Use-Cases were addressed by different R&D Initiatives throughout the last years ...

## Scalable Mobility Solutions & Foundation for System Innovation

# Scalable Mobility Solutions & Foundation for System Innovation CITY

## Step 1: Data Space City 1

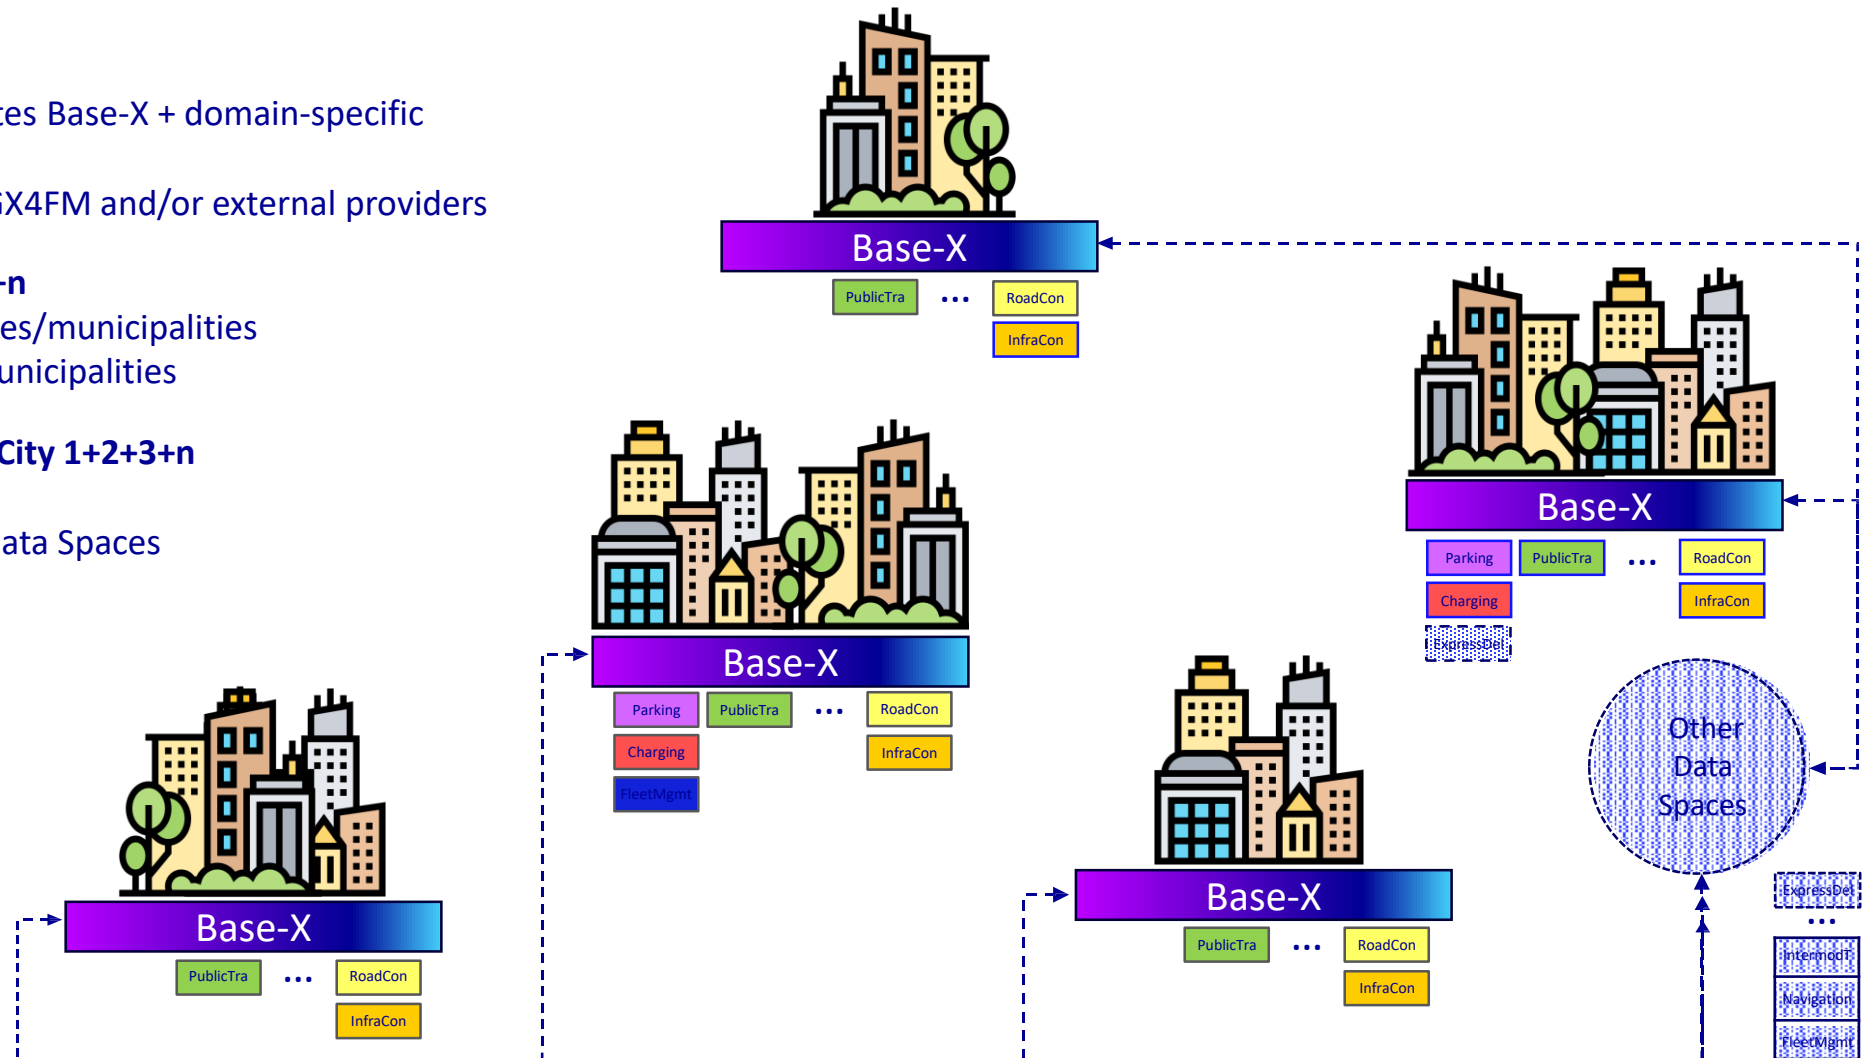

- City/municipality instantiates Base-X + domain-specific semantic model
- Selects applications from GX4FM and/or external providers

## Step 2: Data Space City 1+2+3+n

- Instantiation by further cities/municipalities
- Connection of the cities/municipalities

## Step 3: Connected Data Space City 1+2+3+n + other existing Data Spaces

- Connection with non-city Data Spaces

# Data Spaces and Data/Services Ecosystems

Institute for AI-Safety & Security | Sankt Augustin and Ulm – Germany – [www.dlr.de/ki](http://www.dlr.de/ki)

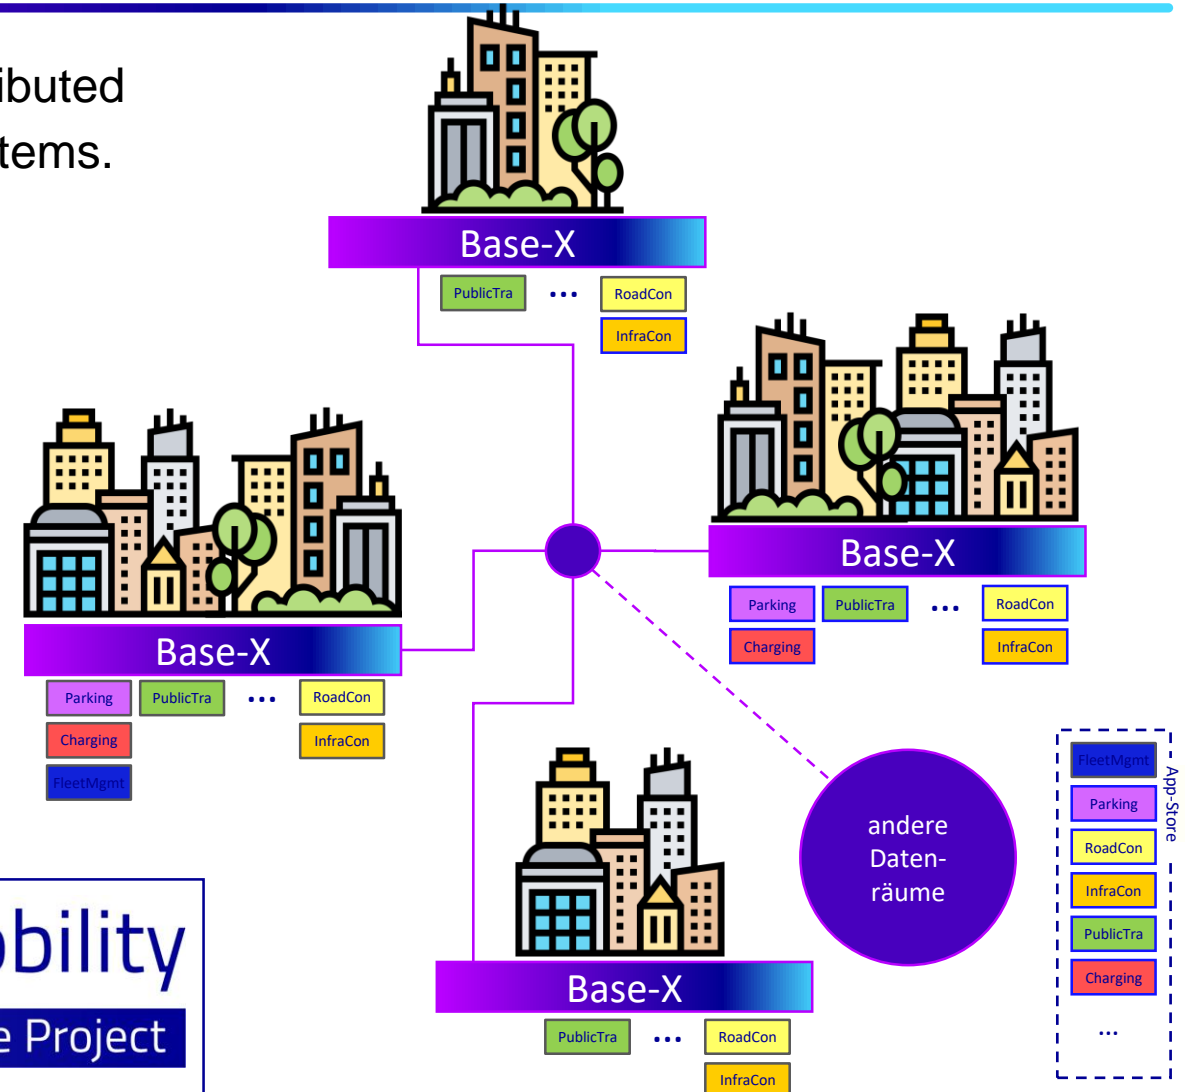

**Data Spaces** are the basis for data exchange in distributed data exchange in distributed data and service ecosystems.

**Standards, processes** and **guidelines** guarantee the central principles

- Trust
- Sovereignty
- Openness and extensibility

Your organization follows federated principles and is based on various **core services**

- e.g. data catalogs and connectors.
